

*EFORT - Travelling Fellowship
Norway, Spring, 2009*

EFORT - JOINT EFFORTS

We arrived Sunday afternoon. Started excellent lectures in Bergen on Monday on registry studies. Tuesday was experimental research and distal radius fracture. Wednesday started in Trondheim on the Unique hip stem, continued with orthopaedic infections, biomechanics, and was concluded with ACL reconstructions and cybernetics.

Friday in Oslo started at the National Hospital with spine and CLP. Hand and reconstructive surgery after lunch.

Saturday was at the Olympic centre in Oslo with knee and sportsmedicine.

Almost all lectures were excellent, but I remember the most the lecture of Ola Wiig and CLP.

Socially it was fantastic! The group was active from the first day, and we enjoyed every evening with good food and drink.

I would heartily recommend this fellowship to later applicants.

Knut Harboe
