during the Joint Congress of the Hungarian Orthopaedic Association and the Hungarian Trauma Society, (MOT & MTT)

"Periprosthetic fractures around Total Hip and Total Knee Replacement"

28 June 2013

Budapest, Hungary

EFORT Fora

Welcome

The project called EFORT Forum, which is an EFORT symposium at a national congress, was started in 2002 at the DGOOC congress in Berlin. The initial idea was to choose one topic for several events, e.g. Thromboprophylaxis, and let European experts discuss it with speakers from various countries to clarify different European criteria and arrive at new standards.

The idea was very well accepted, but the problem was to find European speakers ready to deal with the same topic in up to ten different events. On the other hand, we realised that the national expectations from such a symposium are quite different in different countries.

Consequently, we changed our format and decided instead to organise up to ten European Fora each year with four to six speakers. We plan to provide updates on a variety of hot topics in our speciality. National societies are free to choose a topic and propose a two-to-four-hour session during the yearly congress, preferably on the official opening day of the congress or the day after. EFORT Fora should not clash with the main sessions of the congress, and at least half of the speakers should come from national societies and the other half from other European countries. For this reason the Forum language will be English. Whether simultaneous translation is needed must be decided by the congress organisers. In recent years the EFORT Fora have enjoyed a very high scientific level and provided an excellent exchange between national societies and EFORT. The speakers involved in these Fora were always hosted very graciously and treated as honoured guests of the congress. Accordingly, the interest in such a Forum has growing markedly.

Programme and faculty

EFORT Forum, Friday, 28 June 2013, 14.00 – 16.00

Faculty

Karl-Göran Thorngren
Sweden

Jenő Kiss
Hungary

Tibor Gunther
Hungary

Eleftherios Tsiridis
Greece

Iván Udvarhelyi
Hungary

George Macheras
Greece

Endre Varga
Hungary

14.00 Opening of the EFORT Forum
K-G. Thorngren

14.10 Epidemiology and
classification of periprosthetic
femoral fractures around THAs
and TKAs
T. Gunther

14.25 Treatment of Vancouver B1 and
C fractures: MIPO locking
biological plating and the case
for revision to a long stem
E. Tsiridis

14.40 Treatment of Vancouver B2 and
B3 fractures: Long cemented or
uncemented stems
I. Udvarhelyi

14.55 Treatment of the periprosthetic
fractures around TKAs
G. Macheras

15.15 The advantages and the
disadvantages of the new
ostesynthesis' options
E. Varga

15.35 Bone grafting and/or bone
substitution
E. Tsiridis

15.35 Summary of the EFORT Forum
T. Gunther
