MESSAGE FROM THE PRESIDENT OF EFORT

Wolfhart Puhl
President of EFORT

Dear colleague,

Since its 1st Congress in Paris in 1993, the EFORT organization has greatly increased. The large number of abstracts submitted for this year's 8th EFORT Congress in Florence and the estimated number of 8,000 to 10,000 participants clearly demonstrate that our meeting offers a unique and much appreciated opportunity for European orthopaedic and trauma surgeons to interact with peers.

Embedded into a grand Opening Ceremony & Reception on Friday, May 11 and a Closing & Awards Ceremony on Tuesday, May 15, we will be able to present the orthopaedic community a highly stimulating scientific program. The various symposia and cross-fire sessions will cover all aspects of contemporary orthopaedics and traumatology, and also offer an outlook on the future.

Apart from the outstanding scientific program of the EFORT Congress, Florence is an attraction all on its own. This venerable city boasts an estimated 30 % of the world's most important artwork, churches and cultural treasures.

Thus, we are convinced that the 8th EFORT Congress will not only satisfy your appetite for intellectual stimulation but also for cultural education.

On behalf of EFORT, and also personally, I would like to express my heartfelt thanks to the Chairman of the Organizing Committee, Prof. Franco Postacchini, and the colleagues of the Local Organizing Committee, the Scientific Committee for the superb job they did, the Congress Organizer OIC (and its entire staff) as well as the staff at EFORT headquarters in Zurich for their hard work and devotion.

What a pleasure to see you here in Florence!

A handwritten signature in black ink, appearing to read "Puhl".

Wolfhart Puhl
President of EFORT

MESSAGE FROM THE CHAIRMAN OF THE LOCAL ORGANISING COMMITTEE

Franco Postacchini
Chairman of the Local Organising Committee

Dear colleagues,

It is with great pride that the Italian Society of Orthopaedics and Traumatology (SIOT) hosts the 8th EFORT Congress at the "Forteza da Basso" in Florence, Italy.

The Executive, Scientific and Local Organising Committees as well as the staff at EFORT Central Office have made every effort to set up a scientific programme meant to be comprehensive and attractive to young and senior orthopaedic surgeons alike. I gladly take the opportunity to thank all the people who have contributed with their dedication and hard work to make a success of this event.

The social programme aims to be as appealing as possible for both delegates and accompanying persons. Large spaces are available for exhibition of new or already well-known biomedical products, and numerous industry workshops have been organized. It goes without saying that for the quality level and liveliness of the Congress we rely on the highly motivated speakers and moderators of the Symposia, Cross-Fire sessions, Instructional Course Lectures and Free Paper sessions, and the presenters of the innumerable Posters.

However, the success of the Congress will essentially depend on the active participation in the scientific work of the many thousands of orthopaedic surgeons who have decided to attend. The scientific stimulation and exchange, the cultural setting and the various opportunities to socialize with peers will certainly make this Congress an unforgettable experience from the scientific, cultural and social point of view.

Finally, allow me to add what may sound an obvious thing to say, but do not miss the opportunity to visit Florence with its invaluable artistic heritage, and enjoy the Italian cuisine!

Come to Florence, and you will have the greatest of times!

A handwritten signature in black ink, appearing to read "Postacchini".

Franco Postacchini
Chairman of the Local Organising Committee

WELCOME ADDRESS FROM THE SCIENTIFIC COMMITTEE CHAIRMAN

George Bentley
Chairman, EFORT Scientific and Educational Committee

Dear colleague,

4,300 abstracts were submitted for this year's 8th EFORT Congress in Florence - thus, it was difficult to select among these contributions the most relevant ones for our upcoming meeting.

We interpret this highest-ever number of abstracts received as an indication that you value and use the forum of the EFORT Congress to share your expertise with peers. This is in the very spirit of our organization - we thank you for your active participation!

The 8th EFORT Congress in Florence clearly places a focus on minimally-invasive procedures including arthroscopy. 25 symposia of a total of 100 Symposia, Cross-Fire discussions and Instructional Course Lectures, as well as 250 of a total of 900 free papers, have been dedicated to this highly topical issue.

Also, we have extended our scientific symposia to include two new categories, Sports and Hand/Wrist Surgery. Furthermore, within the framework of an Innovation Park, our industry partners will provide insight into their state-of-the-art products and technologies.

I would like to seize this opportunity to thank all scientific advisors and the members of the Scientific Committee for their tireless work to put together the comprehensive Scientific Programme that we will proudly present in Florence.

We look forward to seeing you there!

A handwritten signature in black ink that reads "George Bentley".

George Bentley
Chairman, EFORT Scientific and Educational Committee

ABOUT THE HOST CITY

ABOUT FLORENCE

Florence has always been one of the cities that everyone would like to visit at least once in their life. It is estimated that 40% of the world's most important artworks are in Italy, and 30% of them are located in Florence. Situated in the heart of Italy, surrounded by the wine-growing hills of Chianti, the city enchants visitors with its timeless charm. It is a marvellous open sky museum where magnificent Italian Renaissance masterpieces can be discovered at every corner.

Often called "the cradle of the Renaissance", Florence owes much of her wealth to the Middle Ages. Banking became big business on the back of the city's profitable wool trade and, in 1235, Florence minted the florin, the first gold coin to become standard currency across Europe. In their turn, these bankers commissioned some of the finest art and architecture in the city.

The names Strozzi, Rucellai and Pitti can be found all over Florence, but it was the Medici family - who led the city for over 300 years - that nurtured the greatest flowering of Renaissance art. The paintings of Botticelli, the sculptures of Michelangelo and the rusticated palaces of Michelozzo all flourished under their rule.

The mingling and the mutual interaction of ancient and modern culture, makes Florence a magical, enchanting and inspiring city. Florence is also a busy cosmopolitan centre which offers in every season of the year many traditional music and theatre festivals, historic cafés, excellent restaurants with international standards as well as picturesque " trattorie" serving the best regional Italian cuisine.

The city's inventiveness, initiative, and originality have always been a source of attraction for international conference tourism and can offer modern, efficient and impressive conference premises in such a suggestive and appealing urban setting. The fact that within few minutes and by taking a short and pleasant walk, people can move from their work setting to the majestic architecture of Piazza della Signoria is priceless.

GENDER
SOLUTIONS

More than two-thirds of the patients who undergo total knee arthroplasty in Europe are women. Zimmer's commitment to improving the quality of life involves recognizing the differences between women and men. Pioneering research led Zimmer to map out the distinctive features of female and male joint anatomy and implement them into prosthesis design. The *NexGen® Gender Solutions™* Knee is the first knee implant shaped to fit women's anatomy. Its three unique design elements address clinical problems more frequently observed in female patients, such as anterior overstressing, postoperative anterior knee pain and patellar maltracking. **Zimmer Gender Solutions – it's all about shape.**
