

EFORT Webinar: ADULT SPINE DEFORMITY

Monday 19 November 2018 | 19:00-20:30 CET | <https://efortnet.conference2web.com/#!courses>

This 'Adult Spine Deformity' Webinar will centre on sagittal alignment, classifications, surgical treatment, burden of disease and its objectives are:

- Demonstrating that harmonious spino-pelvic alignment is the key factor in asymptomatic subjects.
- Showing how classification of adolescent scoliosis is not useful in adult scoliosis and the need of specific classifications.
- Focusing the bridge between degenerative changes and sagittal/coronal deformity.
- Evaluating how important is the spinal alignment for hip surgeon.
- Overviewing the different options of surgical treatment and if there is space for MIS.
- Discussing indication for surgery in this challenging conservative approach.

This Webinar is organised by the EFORT Orthopaedics Education Group independent of any commercial educational support and hosted by M-Events.
