EFORT Webinar | Surgical Treatment of Lumbar Disk Herniation
Monday 28 October 2019 | 19:00-20:00 CET

Learning objectives:

To know the natural history of lumbar disk herniation and understand whether the treatment modifies it.

Be aware that the correlation between imaging and symptoms is controversial and the value of imaging is often overestimated.

Be conscious that surgical options must be critically evaluated in order to choose the best treatment with solid scientific basis.

| WEBINAR “SURGICAL TREATMENT OF LUMBAR DISK HERNIATION” SCIENTIFIC FACULTY |
|-----------------------------|---------------------------|--------------------------|
| 28 October 2019             | MODERATOR*/SPEAKERS       | TOPIC                    |
| 19:00-19:05                 | Claudio LAMARTINA* | Italy                  | Introduction, presentation of the Faculty |
| 19:05-19:20                 | Znedec KLEZL       | United Kingdom          | Natural History          |
| 19:20-19:35                 | Jean-Charles LE HUEC | France                 | Correlation between Imaging and Symptoms |
| 19:35-19:50                 | Pedro BERJANO     | Italy                   | Surgical Options         |
