EFORT Webinar | SEQUELAE OF CALCANEAL FRACTURES
Monday 25 November 2019 | 19:00-20:00 Central European Time

This webinar will address the following topics:

- Approaches - Manuel Resende Sousa (Portugal).
- Diagnosing and treating sequelae – Nikos Gougoulias (UK).
- Managing severe deformities: varus and loss of height, malunited fracture-dislocations – Stefan Rammelt (Germany).
- Limits to joint preservation - Stefan Rammelt (Germany).

Learning objectives:

- Comprehension of different approaches to calcaneal sequelae and establish a rational to their different use.
- Be aware of tips and pitfalls to different approaches.
- Definition of the different sequelae, classification and knowledge to conduct a proper clinical and imaging investigation for their assessment.
- Learn tricks in how to identify and manage varus deformity when performing bone block distraction arthrodesis.
- Defining the limits to where joint preserving surgeries (lateral wall calcaneoplasty, intra and extra-articular osteotomies) can be applied.

This Webinar is organised by the EFORT Orthopaedic Education Group independent of any commercial educational support and hosted by m-events.
