

## EFORT Industry Collaborative Webinar

Tuesday 9 March 2021 | 19:00–20:00 CET

### PROXIMAL HUMERAL FRACTURE TREATMENT, REVIEW & NEW APPROACHES

[www.efort.org/icw](http://www.efort.org/icw)

## EFORT Industry Collaborative Webinar

### 'Proximal humeral fracture treatment, review and new approaches'

Tuesday 9 March 2021 | 19:00-20:00 Central European Time (CET)

---

**Chair:** Samuel Antuña | Madrid, Spain

The Webinar will address the following topics:

- **Introduction**  
Samuel Antuña | Madrid, Spain | 3 mins
- **PHF Classification, indications and possible treatments**  
Franck Mottier | Bourgoin, France | 10 mins
- **External fixation as a minimally invasive approach**  
Davide Blonna | Turin, Italy | 15 mins
- **A standardized technique – clinical cases**  
All Faculty | 20 mins
- **Questions & Answers**  
Samuel Antuña | Madrid, Spain | 10 mins
- **Conclusion**  
Samuel Antuña | Madrid, Spain | 2 mins

#### Learning objectives:

This Webinar "*Proximal humeral fracture treatment, review and new approaches*" will deal with the possible treatments of proximal humeral fracture with a focus on a new minimally invasive approach enabled by a combined technique of pinning and external fixation.

The objectives of the Webinar are:

- Identifying possible treatment options for Proximal Humeral Fractures (PHF)
- Explaining the rationale for the usage of external fixation on the Proximal Humerus
- Understanding the increased indication for use of dedicated external fixator for the treatment of PHFs if compared to standard pinning technique
- Demonstrating the potential for an external fixator applied to PHF
- Recognizing minimally invasive external fixator combined with threaded pins as a valid alternative to internal synthesis for PHFs treatment

This Webinar is organised and supported by Orthofix, hosted by M-Events, and the programme is endorsed by EFORT.
