LEARNING OBJECTIVES:

This EFORT Educational Webinar will focus on clinical examination and evaluation of the lower extremities in children.

Three leading paediatric orthopaedic surgeons will share their experience with us. Clinical examination of children can be challenging, maybe our guest speakers can give you all some tips and tricks on the best way to perform these examinations, in order to detect and evaluate the typical and more rare conditions in the lower extremities in children.

We are especially targeting the residents in orthopaedic surgery with this webinar, but we also invite orthopaedic specialists dealing with children as part of their practice to join the webinar.

This Webinar is organised by EFORT independent of any commercial educational support and hosted by M-Events.
