

Fractures around the Elbow: Floating Elbow Injuries

Chairs: *Thierry Bégué, France & Ingo Marzi, Germany*

The Webinar will address the following topics:

- | | |
|-------------|---|
| 19:00-19:10 | Fractures of the Distal Humerus
<i>Peter Biberthaler, Germany</i> |
| 19:10-19:15 | Interactive Q&A |
| 19:15-19:25 | Instability, Luxations and Defects of the Elbow Joint
<i>Johannes Frank, Germany</i> |
| 19:25-19:30 | Interactive Q&A |
| 19:30-19:40 | Management of Wound Defects around the Elbow in High Energy Traumas <i>Thierry Bégué, France</i> |
| 19:40-19:45 | Interactive Q&A |
| 19:45-20:00 | Panel discussion and Q&A <i>All</i> |

Learning Objectives:

This joint ESTES-EFORT Educational Webinar will focus on elbow injuries which are severe joint injuries often combined with fractures, leading often to long-term joint dysfunction.

Open fractures and severe crush injuries are furthermore demanding in order to get an infect-free closure of the wounds and reconstruction of the joint.

In this webinar, the diagnosis, classification and surgical options for fracture treatment of distal humerus fractures and complex joint injuries of the elbow will be discussed. The treatment concepts for ligamentous injuries will be elucidated and the surgical options for soft tissue debridement and closure of high-energy injuries will be clearly demonstrated.
