

**SHORT-TERM COMPLICATIONS OF
DISTAL RADIUS FRACTURE** (infection excluded)

Chair: *Flore-Anne Lecoq, France*

The Webinar will address the following topics:

19:00-19:05	Introduction <i>Flore-Anne Lecoq, France</i>
19:05-19:15	Bone complications <i>Pedro J. Delgado, Spain</i>
19:15-19:25	Soft tissue complications <i>Piergiuseppe Zampetti, Italy</i>
19:25-19:35	Pain and Stiffness: Is it the Beginning of a Chronic Regional Pain Syndrome (CPRS)? <i>Kai Megerle, Germany</i>
19:35-19:55	Questions and Answers All
19:55-20:00	Final Remarks <i>Flore-Anne Lecoq, France</i>

Learning Objectives:

This EFORT Educational Webinar will focus on the diagnosis and management of the short-term complications of distal radius fracture (infection excluded) and the way to avoid them.

The objectives of this Webinar are to explain the management of:

- The bone complications: malunions, secondary displacement, etc.
- The soft tissue complications: neuroma, Extensor Pollicis Longus rupture, Flexor Pollicis Longus rupture, etc.
- Painful and stiff wrist after distal radius fracture: carpal tunnel syndrome, ulnar impaction syndrome, Chronic Regional Pain Syndrome at an early stage, etc.

This Webinar is organised by EFORT independent of any commercial educational support.
