

Candidate Statement: **Finance Committee EFORT Board.**

I have been keenly involved with Effort for many years as an active member. All these years have seen the organization grow from strength to strength. Most of the work was in Effort congress every year in selection of papers as a reviewer .Presentation and Chairing the sessions, judging papers /posters.

Last few years have been challenging for the organization from financial survivability. It is worrying that we have come to this situation for a vibrant society.

I would like join the finance committee to bring some changes to how we run our society as discussed in the last meeting in Hamburg and further online meeting with President EFFORT.

Personally I have been successful in my work practice and investments with having good idea of money market; it is important for the money to work while one sleeps as famously quoted by Mr. Warren buffet.

We would also need to work on this in war footing as nothing worse than mounting debts in a money market with compound interest rates.

I hope the committee would consider me for this post and give me the opportunity for the same.
